

```
    throw err;
  }
}

// Usage Example:

// For file path input
convertToWebP('image.jpg', 'output_image.webp').then(() => {
  console.log('Conversion from file path successful!');
});

// For buffer input
const inputBuffer = fs.readFileSync('input_image.jpg');
convertToWebP(inputBuffer, 'output_from_buffer.webp').then(() => {
  console.log('Conversion from buffer successful!');
});
```
